

### **QUALIFICATION LEVEL A**

There are no special qualifications for the purchase of these products.

### **QUALIFICATION LEVEL B**

Tests with a B qualification need a high level of expertise in test interpretation, and can be purchased by individuals having:

a degree in psychology, education, occupational therapy, social work, or in a field closely related to the intended use of assessment and formal training in the ethical administration, grading and interpretation of clinical evaluations.

- Attestation or full and active membership in a professional organization that requires training and experience in the relevant area of evaluation.
- A degree or license to practice in health care or in a health field.
- Specific academic training in child assessment, or in infant and child development, and formal training in ethics administration, grading and interpretation of clinical assessments

### **QUALIFICATION LEVEL C**

Tests with a C qualification need a very high level of expertise in test interpretation, and can be purchased by individuals having:

A doctoral degree in psychology, education, or in a field closely related to formal training in ethical administration, grading and interpretation of clinical assessments related to the intended use of the assessment.

License or certification to practice in your province or country in a field related to the purchase.

Attestation or full and active membership in a professional organization that requires training and experience in the relevant area of assessment.
